January - December (Komodo)

About Our SuprabA

SuprabA is a medium size phinisi "lambo", built for open sea cruises and diving by skilled Buginese craftsmen in Tanah Beru, Bulukumba Regency (South Sulawesi) with traditional methods and materials. The design of SuprabA is a combination between Buginese tradition and western classic sailing yachts. All interiors are in natural wood with a chromatic combination of teak and ironwood, all cabins are provided with traditional bronze portholes; although furnished with modern commodities SuprabA retains her character of a sturdy classic and adventurous wooden ship rather than a floating luxury hotel.
